

## The Sun.

MONDAY, JULY 28, 1879.

Advertisements for the week ending July 28, 1879.

The regular circulation of THE SUN for the week ending July 28, 1879, was:

Monday 120,450 Tuesday 121,147 Wednesday 121,720 Thursday 120,445 Total for the week 483,762

## A Pennsylvania Journal on the Presidency.

We copy, in another column, a considerable portion of a leading editorial article in the Lancaster (Pa.) *Intelligencer*, called out by an article in THE SUN on the Presidency. The *Intelligencer*, with all its occasional vagaries, is rather an influential paper in the county and section where it is printed.

The *Intelligencer* remarks of Mr. SEYMOUR that at the time he was nominated and defeated he had all the high qualities he has now. This may be true. Mr. SEYMOUR may have possessed all the high qualities then that he possesses now; but then he may have possessed them in a less degree, or his possession of these high qualities may not have been as well understood then as it is now.

Mr. SEYMOUR's occasional addresses since his retirement from office have exhibited a breadth of imagination of thought, surprising as well as gratifying to his most enthusiastic admirers. For several years past, we have been greatly impressed with the excellence, with the extraordinary comprehensiveness, with the gentleness and Christian spirit pervading Mr. SEYMOUR's utterances. And when, a few weeks since, he delivered that wonderful address to the State prison convicts at Auburn, it almost seemed as if a new inspired prophet had opened his lips.

Mr. SEYMOUR would accept a nomination for any public office at the present time, his election, in our judgment, would be assured in advance, almost beyond peradventure.

## On the Wing.

This Government of ours seems to be a sort of automatic machine which runs without much help when once wound up. When the appropriation bills for the Civil Service are before Congress, estimates, reports, statements, and broadsides of figures are crowded upon the public and the committee, to show how hard worked the officeholders are, and how urgent is the necessity for more assistance. Every department, and every bureau, and every chief of a division, invents a pretext for additional clerks, when those already authorized by law sit in each other's way, and are really obstructions to the public business. A reduction of at least twenty-five per cent. of the whole force could be made, with positive benefit to the service.

Take, for example, the Post Office, which of all the departments comes most directly in contact with the people through the operation of its more than forty thousand offices. There are three Assistants of the Postmaster-General, each charged with a special branch of the service, and all of them are supposed to be constantly occupied, at least during the five or six business hours of the department. For the last three months the First and Third Assistants have been absent from Washington, making a tour of inspection on the Pacific coast, at the expense of the Treasury. Mr. Key, the *de facto* Postmaster-General, took French leave a month ago, and is now wandering in the pine forests of Maine, on his way to the British Provinces.

Mr. BRADY, the Second Assistant, has been doing duty for the three—that is to say, signing his name to official papers, which is the chief occupation of this trio when in Washington.

Mr. JOHN SHERMAN is engaged in improving his Presidential prospects by means of a series of partisan speeches. Mr. DEVENS has retreated to Massachusetts. Mr. EVARTS is here, there, and everywhere, with his headquarters in Vermont. Ancient MARION THOMPSON, after making merry at Fort Monroe, is bound for a long cruise on the *Wabash*. Reformers SCOTT, who has hosted the SHERMAN family, is to speak in the interest of FORSTER in Cincinnati, and then take the world easy again. The Fraudulent President has laid out a programme of free travel after summering at the Soldiers' Home at the expense of that institution.

The heads of bureaus are scattered over the country, and the great number of superintendents report from the gay watering places. Each clerk is allowed one month in every year on leave of absence, without loss of pay. Beyond that time, deduction is made unless for special reasons satisfactory to the head of the office. But the higher officials are not limited to time for absence, and draw full pay, as if actually present and performing duty.

TYLER and HAZEN, the two Assistants of the Postmaster-General, will not only receive their full salaries for a three months' pleasure excursion on the Pacific coast, but every dollar of their expenses, computed on the most liberal scale, will be charged to the general fund. A poor laborer working at the same department would be docked for every hour he lost by rain, or accident, or misfortune. And this is one of the differences between the plain people who toil and the officeholders who do not toil.

## The Issue in Pennsylvania.

The Pennsylvania Ring Convention, called Republican by a long stretch of courtesy, met at Harrisburg on Wednesday last. Everything had been duly arranged before a delegate arrived. CAMERON, KEENE, and QUAY had the candidate and platform ready made, as usual, and there was nothing to be done but to adopt them and adjourn. Even the men who were to make the formal motions were selected beforehand, and their speeches prepared and taught them. GALT, a G. A. G. who is always given the right about by the Ring managers when the spoils and offices are disposed of, was put forward as permanent President to make a hard money speech for a party which last year ignored the currency question entirely, and elected a Senator who has no opinions on the subject or is totally incapable of expressing them by voice or pen. As a painted figurehead Mr. GALT has been a success, and it is not surprising that the Ring should try him again at the outset of a contest wherein every sign is against them; but it is a little curious that a man with a character should allow himself to be put periodically to such base uses.

The most exciting political question in Pennsylvania grows out of the recent rail upon the Legislature by the Pennsylvania Railroad and the chiefs of the old Pennsylvania Ring, the object of which was to "lift" bodily and unceremoniously \$4,000,000 from the pockets of the people into their own. This was the famous RING bill. It was managed by QUAY and KEMBLE, who, as every-

body knows, also manage the Republican party. The State did not owe a dollar. There had been no attempt to bring the issue to judicial trial either against the State or against the county of Allegheny, where the liability rested under the law, if anywhere beyond the company itself. The argument used was the one which might have prevailed under other circumstances against the county, that the failure of the State to put down the riot made it responsible for the ensuing damages. But there was no riot until after the troops arrived and fired on the people. Up to that moment it was merely a strike of the railroad men, and the Allegheny Grand Jury found that the proclamation upon which the troops were called out was a forgery; it could not be traced beyond the Pennsylvania Railroad Company, the Governor was in Utah; there was no official action of the State Administration at Harrisburg; and the Governor and all the rest refused to say whether the paper had ever been made or not.

Yet KEMBLE and QUAY demanded \$4,000,000 damages—just \$2,000,000 more than the self-inflicted losses amounted to. One-half was to go into the pockets of the lobby and into the Republican campaign funds. A committee of the House found that there had been a systematic attempt to pass this infamous bill by widespread corruption of the Legislature, and raised a committee to prosecute KEMBLE and others for the offenses of which they had been proved guilty. The whole State was very naturally aroused and alarmed by these revelations, and one would suppose that if there was any question upon which the political parties would hasten to take strong ground, if they desired the confidence of the people, it would be this one. The Democratic Convention accordingly put itself on record in no uncertain terms in the following resolution:

"That the recent attempt, under the personal direction of the Pennsylvania Railroad Company, to defraud the Commonwealth of four millions of dollars for which its liability was not incurred, and which was accomplished by the use of the aggressive power of corporate power in collusion with political rings, and should receive the signal condemnation of the people of this State."

All eyes now turned to the so-called Republican Convention which assembled a week later. Could it afford to abandon its leaders and turn KEMBLE, one of the bold-est and most useful of them, over to public justice? The RING bill had been urged as a Republican measure; some of the witnesses swore that their votes had been secured on that ground alone. The party was to share as a party in the plunder; the gentleman whom it had recently elected a Senator in Congress gave it his powerful support, and was personally managed by KEMBLE and QUAY, the two ablest and most influential chiefs of the Ring and of the party. This was a trying situation; but Mr. QUAY was equal to the emergency, and it was announced in despatches from Harrisburg days before the event that the honest Republicans who wished to denounce both the steal and the thieves would be gagged, and, if nothing else would do, kicked out.

Mr. WOLFE of Union, the Chairman of the Legislative Committee which exposed the RING bill infamy, and had done his best to punish the crime of the criminals was a member of the Convention. He knew very well that his party was against him and his work; that it belonged, hide, hoofs, and horns, to the railroad and the Ring, and that he could not expect to secure more than a very faint, indirect, and hypocritical condemnation of the villainy in question. He had therefore drawn this mild and pitiful resolution:

"That in view of the developments of recent practices in connection with the RING bill in the last House of Representatives, and the action adopted by the Republican State Convention at Lancaster, and the action of the Pennsylvania State Convention at Harrisburg in 1879, which demands 'honest men in office—men with brains enough to know dishonesty when they see it, and courage enough to fight it wherever they find it.'"

But even this was too much. Mr. HALL, who is W. H. KEMBLE's Harrisburg attorney, was in the chair, and promptly ruled Mr. WOLFE out of order. WOLFE desired only that his resolution might be read; but the Chairman decided that under the order of the Convention referring all resolutions to the Committee without debate it could not be read. The next day, according to the plan of the RING, the Convention was called to order, and there was a scene. The Chair refused to put the appeal to a vote, and WOLFE insisted upon its being done. It was too plain a case, and the Convention would not sustain the Chair. The resolution was read, and then referred to the Committee on Resolutions, of which Mr. QUAY had thoughtfully made himself a member, where it was finally smothered. Thus the so-called Republican Convention, run by the Ring managers, gagged and silenced WOLFE and pointedly refused to condemn the crime and the corruptions in the mildest possible manner.

The two parties have taken their stand on this important question, and it remains to be seen which the people of Pennsylvania will sustain—the one which openly declares in favor of legislative plunder and corruption, or the one which heartily condemns KEMBLE and the whole system of Addition, Division, and Silence.

## No Indian War Needed.

No vald or even plausible excuse has been made or can be made for giving a hostile character to the white man's expedition, under one of the most brilliant and experienced Indian fighters, Gen. NELSON A. MILLS, is now north of the Missouri and approaching the Canadian line.

It is true that MILLS is a prominent aspirant for the next Brigadier-Generalship, but that does not justify an Indian war; it is also true that scouts ever and anon bring rumors of hostile words and acts of SETTING BULL's followers, but these idle rumors do not justify a war.

So far as can be known, the attitude of SETTING BULL is as friendly now as it has been for the whole year, and during the whole of which period the intent to commit acts of hostility has been from time to time attributed to him. Indeed, the latest tidings on this subject are those brought by Lieut. ALA POINT of the Second Cavalry, that WOLF's band of Crows, at Barry's Landing, reports 300 lodges of Sioux south of the Missouri, on the way to Tongue River, to make friends with the whites.

It is undoubtedly true that an unusually large number of Indians belonging to no reservation, and not acknowledging any obligations to the white man's government, are now between the upper Missouri and the Canadian border. But it yet remains to be proved that they are there with hostile intent. On the contrary, all the tidings go to show that they are following the buffalo, which at this time are moving south, and that this purpose of peaceful hunting, and that alone, has brought them south of the border. It would be hardly more absurd to demand of the buffalo to respect an imaginary boundary line than to ask the Indians to do the same, even supposing that we have any right to forbid red men or white from peacefully crossing it.

The new military expedition will keep within its lawful scope if it confines itself to ordinary reconnoissances, with a view to finding what the military necessities of the

region demand, or to placing the troops in a summer camp. It will go far beyond its proper purpose if it undertakes to treat all roving Indians that it comes across or can discover by search as outlaws, to be attacked in war.

## Ohio the Mother of Officeholders.

The Supreme Court of the District of Columbia consists of six Judges. Until recently, five composed a full bench. The sixth was added to compensate for the inefficiency of Judge HUMPHREYS, who died a few weeks ago. DAVID K. CARTER, formerly a member of Congress from Ohio, and afterward Minister to Bolivia, is Chief Justice. The Fraudulent President has just filled the vacancy caused by HUMPHREYS's death by his appointment of Chief Justice. The report of the fact that in one great branch of industry, England, she has not lost her supremacy, has admitted a very formidable rival in this country. The iron manufacturers of Great Britain have been doing nothing but making and selling iron goods, exhibiting ingenuity, finish, handiness, and cunning, the Americans are far ahead. It is remarkable that American goods are sent across the Atlantic, and sold in Sheffield at a less price than similar articles of home make can be bought for on our own shores. The iron manufacturers of Great Britain have the quality of adaptability, in which the English manufacturers are deficient. The former, he says, know how to discover the peculiar tastes and wants of their countrymen, and by suitably them they get a quick market. The iron manufacturers of Great Britain, on the other hand, are content to produce iron goods, exhibiting ingenuity, finish, handiness, and cunning, the Americans are far ahead. It is remarkable that American goods are sent across the Atlantic, and sold in Sheffield at a less price than similar articles of home make can be bought for on our own shores. It is remarkable that American goods are sent across the Atlantic, and sold in Sheffield at a less price than similar articles of home make can be bought for on our own shores. The iron manufacturers of Great Britain have the quality of adaptability, in which the English manufacturers are deficient. The former, he says, know how to discover the peculiar tastes and wants of their countrymen, and by suitably them they get a quick market. The iron manufacturers of Great Britain, on the other hand, are content to produce iron goods, exhibiting ingenuity, finish, handiness, and cunning, the Americans are far ahead. It is remarkable that American goods are sent across the Atlantic, and sold in Sheffield at a less price than similar articles of home make can be bought for on our own shores.
